

Paxton Net2 Integration datasheet

Overview

Customers that have previously invested in Paxton access control and now require a feature rich employee attendance solution can benefit from a software only integration that requires no additional attendance devices.

Paxton

With over 30 years of experience, Paxton design and manufacture market-leading security solutions for a range of premises. Around 25,000 buildings each year are secured globally with Paxton products. Paxton’s global Head Office is based in Brighton and they have colleagues in 12 countries and export to over 60 countries worldwide.

timeware®

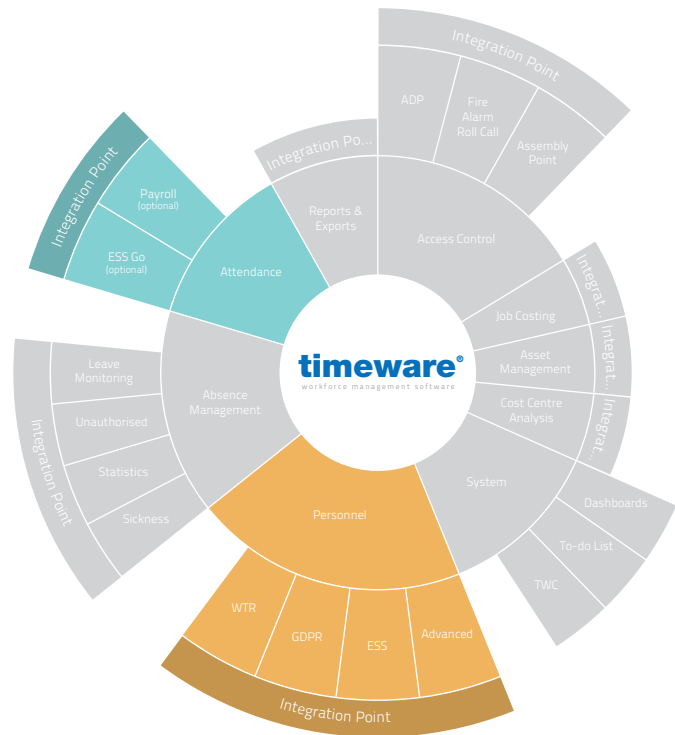

timeware® has developed an integration that sits seamlessly between timeware® Professional and the Paxton Net2 access control system.

This integration eliminates ‘duplicate entry’ and allows employees and some basic credentials created in Net2 to be passed directly to timeware.

An administrator can specify which Net2 readers are classed as attendance points and bookings made at these points can be read by timeware® from the Net2 database and processed by timeware® as attendance bookings. This method means that a Net2 user can benefit from a timeware® Professional installation without the need to purchase additional attendance devices.

Annual licence

The Paxton integration is enabled by an annual licence.

Paxton Net2 Integration datasheet

Technology

Direct connection to Paxton database.
timeware[®] Event Handler (VB Scripting).

timeware[®] Event Handler Script [Event Handler] Paxton Net2 Personnel Import

Imports personnel records into timeware[®].

'Please not this will only add new personnel. It will not take amendments made into account.'

timeware[®] Event Handler Script [Event Handler] Paxton Net2 Booking Import

Imports access control records from Paxton into timeware[®].
