

Sage Payroll Integration datasheet

Overview

Integrating with Sage Payroll eliminates the need to enter employee details into both software systems and also eliminates the need to enter employee hours worked into Sage.

Sage Payroll

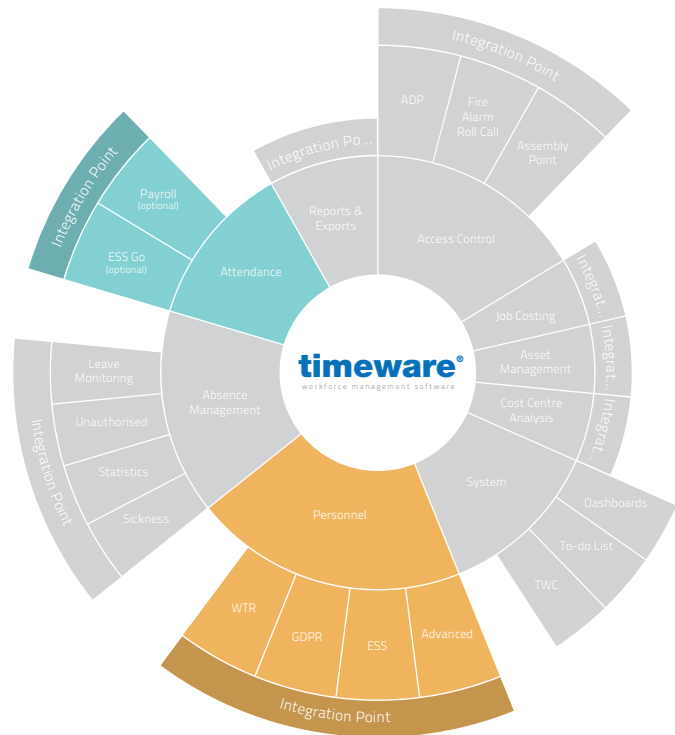

Sage Payroll is a payroll software product offering by Sage for small to medium sized businesses. Many UK businesses use Sage Payroll to manage payroll processes including payslips, employee pay, pensions, expenses, statutory pay, tax calculations and HMRC submissions.

timeware®

timeware® has developed an integration that sits seamlessly between timeware® Professional and Sage Payroll. The integration eliminates 'duplicate entry' and allows employees created in Sage Payroll to be created automatically to timeware®. Following overtime approval, the total hours worked data held in timeware® can be transferred to Sage Payroll, therefore eliminating manual data entry.

Annual licence

The Sage Payroll integration is enabled by an annual licence.
